

Jack's Barber Style

GST Registration & PayID Readiness Guide

Version 1.0 - June 2026 - For owner, bookkeeper & website setup

47 O'Meara Street, Wodonga VIC 3690

Important: This document is general guidance for a small Australian barber business. It is not legal or tax advice. Confirm your obligations with a qualified accountant or tax agent based on your business structure (sole trader, partnership, company, etc.).

1. Purpose

This guide explains what Jack's Barber Style needs after registering for GST (or while preparing to register) before accepting PayID and bank transfer (EFT) payments for online bookings on the website.

GST registration and PayID are separate steps:

GST - how you report tax to the ATO

PayID - how client payments arrive in your business bank account

PayID does not calculate or deduct GST. Your tax invoices, bookkeeping, and BAS (Business Activity Statement) do.

Related document: PAYID-SETUP.txt (project root) and docs/PayID-GST-Integration-Guide-Jacks-Barber-Style.pdf

2. What is a GST account? (Clarification)

In Australia you do not receive a separate GST account number from the ATO. When people say GST account they usually mean one or more of the following:

- GST registration linked to your ABN
- Your business bank account (where PayID payments land)
- Internal bookkeeping to track GST collected and owed

For PayID on your website you need all three set up correctly - but only one actual bank account.

3. What you get from GST registration (ATO / ABN)

After registering for GST, record and use these details on invoices, receipts, and the website:

Item	Why you need it
Legal / trading name	Exact spelling on tax invoices (Jack's Barber Style)
ABN	Required on tax invoices; can also be used as your PayID
GST registration start date	When you must start charging or showing GST correctly
Accounting basis	Cash or Accrual - affects when GST is reported on your BAS
BAS lodgement cycle	Usually quarterly (sometimes monthly or annual)
GST reporting method	Usually Simpler BAS for turnover under \$10 million
Business address	47 O'Meara Street, Wodonga VIC 3690
Contact email / phone	Jacqueskatumbulu@gmail.com / 0478 268 399

4. What you need from your bank (for PayID)

Set up on your business bank account - not a personal account:

Bank detail	Purpose
Account name	Must match your business name (Jack's Barber Style)
BSB + account number	Backup if a client pays by standard EFT instead of PayID
PayID	Instant payments - commonly your ABN, mobile, or business email
Business transaction account	Correct account type for a sole trader or small company

Recommended PayID options for this business:

- Mobile: 0478268399
- Email: Jacqueskatumbulu@gmail.com
- ABN (once registered for GST)

Money goes directly to your business account. No Stripe, PayPal, or card processor is required. Optional: Azupay can auto-confirm payments via webhook (see PAYID-SETUP.txt).

5. Questions for your accountant (before going live)

Confirm these before showing GST amounts on the website:

- Should Jack's Barber Style register for GST? (Turnover of \$75,000+ generally requires registration.)
- Are barber and hairdressing services GST-taxable? (Generally yes for commercial barbers.)
- Is the home service travel fee (\$15) a separate taxable supply or part of the service?
- Should website prices be GST-inclusive or GST-exclusive?

Example inclusive (recommended for clients): Skin Fade \$40 total (\$36.36 + \$3.64 GST)

Example exclusive: \$36.36 + \$5.00 GST = \$40.00 total

- Do we need a formal tax invoice for every paid booking?
- Are we reporting on a cash or accrual basis?
- Can we use Simpler BAS given our expected turnover?

6. What to show on every receipt / tax invoice

Once GST-registered, each receipt or tax invoice should include:

- ☐ Business name: Jack's Barber Style
- ☐ ABN
- ☐ Tax invoice wording (when required by ATO)
- ☐ Unique invoice / receipt number (e.g. JBS-INV-2026-0042)
- ☐ Date of issue
- ☐ Client name and email
- ☐ Description (e.g. Skin Fade - in-shop, 15 Jun 2026 10:00 AM)
- ☐ Service amount and GST component (if applicable)

- ☐ Total amount paid
- ☐ GST note: "Total price includes GST" or GST amount shown separately
- ☐ Payment method (PayID / EFT)
- ☐ Payment reference used by the client (e.g. b1719567890123)

Sample layout

TAX INVOICE

Jack's Barber Style
47 O'Meara Street, Wodonga VIC 3690
ABN: [Your ABN] | Phone: 0478 268 399

Invoice #: JBS-INV-2026-0042 Date: 28/06/2026
Booking ref: b1719567890123

Bill to: John Smith | john@example.com

Skin Fade - in-shop on 15/06/2026 at 10:00 AM	\$40.00
Subtotal (ex GST)	\$36.36
GST (10%)	\$3.64
TOTAL (inc GST)	\$40.00

Paid via PayID | Reference: b1719567890123

7. Internal bookkeeping (GST tracking)

You do not need a second bank account for GST, but you should track GST in your records:

Ledger / category	Purpose
Service income	Haircuts and grooming from in-shop bookings
Home service income	Bookings with travel fee (service + \$15 travel)
GST collected	10% set aside for the ATO (liability account)
Bank fees	Usually minimal for PayID / EFT
Business expenses	Rent, tools, products - GST credits if GST-registered

For each PayID payment, record:

- ☐ Gross amount received
- ☐ GST portion (total / 11 if price is GST-inclusive)
- ☐ Net income portion
- ☐ Booking reference (matches website booking ID)
- ☐ Date received in bank
- ☐ Who confirmed payment in Staff admin
- ☐ Receipt / invoice number issued

This supports your BAS: GST collected on sales minus GST credits on expenses = net GST owed to the ATO.

The website records paid bookings in Finances (Staff area) and transactions.json with gst and net fields when GST_REGISTERED=true on Vercel.

8. Payment reference format

Unique references help you match bank deposits to bookings:

Type	Format	Example
In-shop booking	b + timestamp (auto-generated)	b1719567890123
Home service booking	Same booking ID	b1719567890456
Manual / phone booking	Optional prefix JBS-	JBS-SMITH-150626

Clients must include the booking reference when paying via PayID or EFT. The website displays this reference automatically after they submit the booking form.

9. Client payment flow (PayID + EFT)

Client visits website and opens Book section (#book on index.html)

- > Selects service (e.g. Skin Fade \$40), date, time, in-shop or home service
- > Submits booking form
- > Confirmation shows PayID + exact amount + booking reference + GST (if configured)
- > Client pays from their banking app
- > You see deposit in business account
- > Booking marked Paid (manually in Staff, or automatically via Azupay webhook)
- > Tax invoice / receipt sent to client
- > Appointment status: Confirmed - reminders can send

Website status

- Live: Online booking, service prices, PayID instructions, Staff admin, Finances, CSV export
- Configured via Vercel: PAYID, PAYID_NAME, BUSINESS_ABN, GST_REGISTERED
- Optional: Azupay for automatic payment confirmation webhook
- Not used: Stripe, card payments, PayPal

10. Pre-launch checklist

- ☐ ABN active and correct on all documents
- ☐ GST registered (if required or chosen)
- ☐ Accountant confirmed GST treatment for barber services and travel fee
- ☐ Business bank account opened (not personal)
- ☐ PayID enabled and linked (mobile, email, or ABN)
- ☐ BSB + account number ready for EFT backup
- ☐ Invoice / receipt template agreed with accountant
- ☐ Payment reference format understood (website booking ID)
- ☐ Process documented: match bank reference -> mark paid in Staff -> send receipt
- ☐ BAS lodgement dates in calendar (usually quarterly)
- ☐ PAYID and GST_REGISTERED environment variables set on Vercel
- ☐ Test booking completed on live site - PayID panel shows correct amount
- ☐ Old STRIPE_* variables removed from Vercel (if any)

11. What to provide for website PayID integration

Provide these to configure the live site (Vercel environment variables):

- 1. Trading name: Jack's Barber Style
- 2. ABN
- 3. PayID (mobile, email, or ABN as registered with your bank)
- 4. BSB and account number (for EFT backup on receipts - optional on site)
- 5. Service prices (managed in Staff area - Services list)
- 6. Home service travel fee (currently \$15 - Staff settings)
- 7. GST wording from accountant (GST_REGISTERED=true/false)
- 8. Receipt contact email: Jacqueskatumbulu@gmail.com
- 9. Site URL: <https://jack-barber-rho.vercel.app>

Vercel environment variables

Variable	Example	Required
PAYID	0478268399	Yes
PAYID_NAME	Jack's Barber Style	Yes
SITE_URL	https://jack-barber-rho.vercel.app	Yes
BUSINESS_ABN	XX XXX XXX XXX	For tax invoices
GST_REGISTERED	true	If GST-registered

AZUPAY_CLIENT_ID	(from Azupay)	Optional
AZUPAY_SECRET	(from Azupay)	Optional

12. Current service prices (GST-inclusive examples)

If GST-registered and prices include GST, the GST portion is total / 11:

Service	Price (inc GST)	GST (1/11)	Ex-GST
Skin Fade	\$40.00	\$3.64	\$36.36
Afro Cut	\$45.00	\$4.09	\$40.91
Twists & Retwist	\$50.00	\$4.55	\$45.45
Beard Trim & Shape	\$25.00	\$2.27	\$22.73
Home travel fee	\$15.00	\$1.36	\$13.64

13. Security & business reminders

- Never use a personal bank account for business bookings
- Publish PayID and bank details only on your official website
- Keep a ledger: booking ID, client name, amount, date, method, who confirmed
- Reconcile bank statement monthly against Staff Finances export
- Keep tax invoices and payment records for at least 5 years (ATO requirement)
- Home service: confirm address and travel fee before marking booking confirmed

14. Related documents (project folder)
